For \$2.99 I would say its ok for for \$14.99 I would say no way. This game is pretty mudane. Moving snow from the same spot almost everytime and marshling aircraft from the same spot almost everytime. Only buy this game when it's on sale as it is not worth the full price they are asking.. During the golden age of PC games this one was an instant classic. Imagine Wing Commander or Elite with updated graphics and fresh story. You got yourself Tachyon: The fringe.. One very fine puzzle game with simple controls, visuals and audio...but all these simple elements meld into good game.. Funny game.

You can earn achievements.

And you can get trading cards.. bleep bloop. Great graphics and sound and some nice humor, wasted on the randomness of Breakout. If you like that sort of game you're set, if you're irritated by the concept of missing collectables because a ball won't bounce the way you need it to, pass.

First of all: why does it say it was inspired by Robert Heinlein's *The Moon is a Harsh Mistress*? Apart from one insider joke, there is absolutely no connection with this story.

It's a short experience. Really short. Feels like a demo of a game that hasn't much content. That means it has almost no content. The plus points are that it looks OK and it runs smoothly without technical glitches.

I can't say much more positive. The story is very thin. There is nothing I haven't seen in other games before.. The Westport Independent is a good game, but it's too short. I plan to do another playthrough but there's only really two or three major ways to play the game, so this is not good value for money and therefore a Don't Buy.. This tool, even though it simplifies and streamlines the process of making a platformer, is extremely barebones and really needs some work for me to recommend it... Bear with me a little here:

I bought this game motivated by the trailers and it didn't live up to my expectations at all, it needs a lot more polish, specially in the mechanics you are allowed to introduce to the game.

My main problem is that in the trailers it showed you can import Mario, Sonic and even Wonderboy assets, even though you can't melee hit enemies with a sword, or even jump on top of their heads to kill them (you must use an ingame potion to be able to do this...), so you're restricted to using a selection of simple projectiles as your basic means of attack.

It has other problems, most notably the sound (simple 8-bit SFX and chiptunes is all you get, and it gets old quick) and HUD, which is disorganized and not very visually pleasing to be honest.

If a tool that advertises itself as a "make your own game based on your favorite retro-games" only offers gameplay elements from Megaman and calls it a day, i just simply can't recommend it, not even as your first attempt at a platformer maker.. i don't know if I'm too stupid for it but even with help from an online walkthrough i didn't get out of the shell where you're trapped in at first. Just.... one... more tile..... "NO MORE DRAWS" - BAKA!!!!!! - ♥♥♥♥♥.. redo

This is a version of Mahjong we western people believe is the real Mahjong even though it has nothing to do with the real deal.

The execution is well done I think and it provides a pseudo ~stripmahjong into it I like to call Clothesswitcherinomode. The clothes are well designed i gues?

For the current 90% off it's a nobraindeal
For fullprice... meh... you can do this i gues

Playtime: probably around 4-12 hours - depending on how skilled/lucky you are on the last lady.. she can be quite the bummer

Overall probably 9 - 9.5/10 as it's really a good Solitair Mahjonggame

Pro:

- Awesome Music
- Cute characters - I mean with pretty girls in the name this was necessary
- Tradingcards
- Achievements
- Good for short brakes
- Characters get mad at you when you mess up
- characters are nice to you when you're on a roll

Con:

- Maybe the 15€ pricetag is a bit high? 10€ it's fine i gues... on sale its 100% recomanded
- For many ppl the overly big breast of blondie might be a con? It's classic in anime nowadays to have at least one for the quota so it's not of a bother for me (even old animes like dragonball had them.. no big deal)

I would say appropriate/recommended for 15 and above / USK 16 ? as 12 might be a bit oversexualized but not overly sexualized as Honiepops is (without the Honeypop H scene addon, with its 18). All in ~probably 14/15+ recommended.

List of the Sexualized things: every 3rd stagepart they moan a bit (on repeat the always the same), big breasts on 2 - one overly huge, Catgirlbikinisuit, Lots of bikinis in general ~not rly sexualised anymore in those days.. It costs next to nothing, but it's also

very short. Personally, I really like this.

First of all, the art is so amazingly good that I for the time it was in my wishlist, I thought it was just pictures of actors. The attention to detail is immaculate. The way people stand. The way they pose themselves. It feels so natural. Some small visual effects add life to the image and the lighting and other such stuff is just nice to look at. Top notch quality.

Secondly, the soundtrack is just awesome. I'd love to buy the soundtrack. It just fit the game so well and it complements everything amazingly.

Third, the story. Other than a couple of lines, it's well written. You see a slice of someone's life. Enough of a slice that it gives you the context you need and it was also interesting enough that I wanted to know more about all the characters. They all seemed like real people.

But the elephant in the room will be the length. It still costs money. It costs 1€ or so. Sure, it's not a lot of money, but 12 minutes is not a lot of time either. This story would've served well if it was double in length. Show what happened during the night after the event of the main story. There's potential there and it would've served the game nicely. Had this been 20-30 minutes, I'd be way more lenient with recommending it. But right now this is definitely a bit too short.

Overall, this was an awesome experience and I don't regret spending the 84 cents. But if you're younger or you haven't got any real money to buy games, this won't be a satisfying gaming experience.
