I see we have a visitor. Professor Meme, if I'm not mistaken.

the land of the sezogs

A very interesting retro style point and click adventure, would recommend always, even more if you feel like kind of nostalgic about those spectrum times, also nice little futuristic story to spend a couple of hours exploring this world.. It's a nice game. It has a classic point & click gameplay, simple but very effective pixel perfect graphics, immersive music and simple but effective sound effects.

It also has some interesting and tricky puzzles.

Resolving all puzzles quickly the game lasts about 2 hours.. It's a pretty good game. Fun point-and-click. Took about 3 hours to beat. Will definitely play the next game these guys make, and I hope they do make more.
